READING
 Your score: 220
 Scale: 5 to 495

TOTAL SCORE
 645

Client/Institution Name: Direktorat Pembinaan SMK

LISTENING
 Your scaled score is between 100 and 200. Test takers who score around 100 typically have the following strengths:
 - They can infer the central idea, purpose, and basic content of short spoken exchanges across a broad range of vocabulary.
 - They can infer the central idea, purpose, and basic content of extended spoken texts across a broad range of vocabulary.
 - They can do the same when the information is not supported by repetition or paraphrase and when it is necessary to connect information across the text.
 - They can understand details in short spoken exchanges, even when negative constructions are present when the language is particularly complex, or when difficult vocabulary is used.
 - They can understand details in extended spoken texts, even when it is necessary to connect information across the text and when this information is not supported by repetition. They can understand details when the information is paraphrased or when negative constructions are present. To see weaknesses typical of test takers who score around 420, see the "Proficiency Description Table."

READING
 Your scaled score is between 100 and 200. Test takers who score around 100 typically have the following strengths:
 - They can locate the correct answer to a factual question when not very much reading is necessary and when the language of the test matches the information that is required.
 - They can understand easy vocabulary and common phrases.
 - They can understand the main content, sentence-based grammatical structures when not very much reading is necessary.
 - To see weaknesses typical of test takers who score around 100, see the "Proficiency Description Table." If your performance is closer to 200, you should review the descriptions for test takers who score around 200.
